Date/ Place of Birth: 24.06.2003, Jangarreddigudem, India

About Me

Master's student in Intelligent Robotics at Technische Hochschule Deggendorf with strong skills in AI, automation, and robotics. Skilled in Python, machine learning, and tools like UiPath and TensorFlow. Experienced in academic projects involving NLP and real-time systems. I am eager to apply my skills in AI or RPA-focused work student or internship roles.

Skills

- Python, C++
- ROS Noetic
- ML
- AI
- Robotics and Automation
- CAD

EDUCATION

Master of Engineering in Robotics – M.Eng. 03/25 - present

Deggendorf Institute of Technology, Germany
Current Grade: 2.3

- Specialization in Intelligent Robotics based on Robot Perception, Advanced Control Systems and Machine Learning for Robotics.
- Developed and tested robotic applications using simulation tools and real-world platforms, emphasizing mechatronic system design, motion planning, and machine vision.

Bachelor of Computer Science and Engineering – B.Eng. 01/21 - 04/24

GMR Institute of Technology, Rajam, India

- Relevant Coursework: Data Structures and Algorithms, Embedded Systems Programming and Computer Vision.
- Final Grade: 8.37/ 10

WORK EXPERIENCE

Business Development Intern 12/23 - 07/24

Movidu Technologies Pvt. Ltd., Hyderabad, India

- Movidu is a unique platform connecting industry and academia, providing Microsoft licenses across India and making it simple for companies to find, hire and engage talents while they are still studying.
- Conducted research to identify new business opportunities and support decision-making for outreach campaigns.
- Assisted in lead generation and client outreach through LinkedIn and email, contributing to a growing sales pipeline and setting up meetings for the senior business development team.

PROJECTS

Autonomous Driving using Reinforcement Learning 06/25 - present

Personal Project

- Built an autonomous-driving research project with reinforcement learning for lane-following and control in simulated driving environments.
- Implemented training and evaluation using PPO and SAC, alongside classical baselines such as PID and Stanley controllers.
- Developed modular components for environment design, reward shaping,

Enhanced communications through isolated sign 07/23 - 10/23

Bachelor's Thesis Project

- Developed a deep learning-based system for recognizing isolated sign language gestures from video sequences to improve accessibility for hearing-impaired individuals.
- Software and Tools Applied: Python, TensorFlow, OpenCV, NumPy, scikit-learn, Jupyter Notebook.
- Published paper in IEEE, 2023.

A framework for key point neural invariant feature transform 10/22 - 01/23

Bachelor's Case Study

- Developed a novel framework combining neural networks and invariant feature transforms for robust key point detection and matching under varying illumination and perspective.
- Software and Tools Applied: Python, PyTorch, OpenCV, MATLAB.

Professional Skills

- Structural analysis
- Problem-solving
- Project management
- Communication & presentation
- Collaboration & team work
- Reliable & independent workstyle
- Adaptable to changing priorities & new tools
- Keen interest in emerging technologies
- Quick learner

Languages

- English – fluent (B2)
- German – basic (A2)
- Hindi and Telugu – native

TRAINING AND CERTIFICATES

- Google Data Analytics Wipro Java Full Stack Developer, 2024.
- Machine Learning for All. Coursera, 2023.

EXTRACURRICULAR ACTIVITIES

- Supported peers in understanding robotics, programming, and machine learning concepts through collaborative discussions and problem-solving
- Developed independent projects including a vision-based lane detection and path planning system and a reinforcement learning navigation model using ROS2
- Continuously enhanced skills in PyTorch, computer vision, and autonomous systems through self-driven learning beyond coursework
- Adapted to an international academic environment and collaborated effectively with students from diverse cultural backgrounds

HONORS AND AWARDS

- Received Honors Degree in Data Engineering. GMR Institute of Technology, 2024.

INTERESTS

- Following up emerging technology & innovation trends
- Jogging & outdoor activities
- Travelling & exploring cultures

Cham, 26.06.2026
